U.S. hospitals and public-health labs are adding temporary drive-through and walk-up testing sites for the coronavirus (COVID-19).

STEP CG’s Mobile Network as a Service provides 100% uptime, secure connectivity and 24/7 engineering support.

HEALTHCARE TESTING
Mobile & Temporary Solution

Built for rapid deployment in clinical-grade environments, STEP CG’s Mobile Network as a Service, powered by Cradlepoint, provides multi-wan capability for gigabit-class connectivity and enterprise-grade security and management.

BENEFITS:
- Single POC for device acquisition, configuration, testing and provisioning
- Fully managed solution
- Gigabit class LTE connectivity supporting AT&T, Verizon & Sprint/T-Mobile
- FirstNet & First Responder certified
- Reliable, proactive network monitoring, management and maintenance
- Can be installed quickly in the field without IT involvement
- Maintain security through VPN connectivity and edge
- Threat detection and content filtering
- Wi-Fi to easily connect multiple devices allowing limitations on what can connect
- Cloud-managed for ease of troubleshooting and application visibility
- Highly skilled technical support services
- Secure device configuration
- Automated security update management

FEATURES:
- Awareness: detailed, custom alerting
- Insight: custom dashboard and reports
- Security: robust security functionality
