

SOLUTION BRIEF

K-12 EDUCATION SOLUTIONS

Making Lessons Come Alive with Technology

Your students are the future - why not give them the tools to live up to their potential? Whether you need audio-visual solutions to create engaging classes or software that makes organizing and grading student work a breeze, STEP is invested in making your school a success.

IT THAT EARNS YOUR SCHOOL A GOLD STAR

Is your IT fulfilling all your needs? Some signs that it isn't slow connection speeds, frequent downtime and ballooning technology costs. If you're trying to operate on a tight budget while helping students, faculty and administrators work together to succeed, STEP wants to be your partner. Our flat-fee solutions manage operating costs and maximize your uptime, so you're never wasting an opportunity to learn because of aging or dysfunctional IT. From projectors to workstations to mobile devices, we keep every piece of your tech working efficiently to help you achieve your mission - shaping the future.

Affordable Pricing

Don't spend money on licenses or capabilities you don't need. Our simplified pricing ensures you only pay for what you use and can easily grow or scale back your plan based on your organization's unique requirements.

Single Point of Contact

Do you have to dig through old emails and phone contacts to find the right person to answer your questions? There's a simpler way - callus. We'll become your single point of contact, communicating with all of your vendors on your behalf.

Business Continuity

Whether you experience a natural disaster, power failure or human error, having your data stored in the cloud ensures it's backed up, protected and easily accessible. You'll be able to conduct business as usual to minimize downtime and lost productivity.

Improved Mobility

With cloud, your team can access data and applications no matter where they are in the world via smartphones, tablets and computers. Everyone can stay connected and easily share information in real time, enhancing the collaboration process.

Strict User Access

Keep unwanted eyes away from business and client data. STEP ensures private data remains private by limiting user access to ensure illicit hands don't access, damage or delete any confidential data.

Expert Guidance

Our technicians see to it that your IT systems and network deliver optimal performance. That's why we take the time to learn your goals, challenges and budget, then work to create an IT strategy together that meets your objectives.
